

To Whom it May Concern

10th March 2022.

Re: PM Industries

PM Industries has been a preferred applicator of Rhino Linings Flooring products since 2011. Over this significant period Peter Clinton and his team have consistently demonstrated a level of experience and application knowledge that is significantly superior to their competitors. The extent that they pride themselves in their level of attention to detail and customer satisfaction is also clearly noticeable.

They have successfully applied our products on many large projects including Ausco Modular, Royal Perth Hospital and many industrial, commercial and properties and community facilities.

The quality of application has significantly added to the recognition of Rhino Linings flooring products with architects, builders, specifiers, and the general public in Western Australia over the many years that Rhino Linings has been working with PM Industries.

I take great pride and am extremely grateful of the mutually beneficial professional relationship our company enjoys with PM Industries and look forward to it continuing for many years to come. Having a relationship with a company that values professionalism, integrity, honesty, and a genuine commitment to ensuring the job is always done right with 100% customer satisfaction is an extremely valuable commodity and I would have no hesitation in recommending Peter and his team at PM Industries to any business or individual for any application they may be considering.

Please feel free to contact me if you have any questions or would like any additional information regarding the above.

Kind Regards

Peter Morgan | General Manager
